Independent auditor's report

To the Board of Directors and Shareholders of Makedonski Telekom AD - Skopje

We have audited the accompanying consolidated financial statements of Makedonski Telekom AD – Skopje (the “Company”) and its subsidiaries T-Mobile Macedonia AD Skopje and E-Makedonija foundation – Skopje (together “the Group”), which comprise the consolidated statement of financial position as of 31 December 2011 and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements give a true and fair view of the financial position of the Group as of 31 December 2011, and of its financial performance and its cash flows for the year than ended in accordance with International Financial Reporting Standards.

Notes to the consolidated financial statements

1. GENERAL INFORMATION

1.1. About the Company

These consolidated financial statements relate to the group of Makedonski Telekom AD - Skopje, which includes Makedonski Telekom AD - Skopje, T-Mobile Macedonia AD Skopje and e-Makedonija foundation – Skopje (hereinafter referred as: "the Group").

Makedonski Telekom AD – Skopje, (hereinafter referred as: "the Company") is a joint stock company incorporated and domiciled in the Republic of Macedonia.

The Group's immediate parent company is AD Stonebridge Communications – Skopje, under voluntary liquidation, solely owned by Magyar Telekom Plc. registered in Hungary. The ultimate parent company is Deutsche Telekom AG registered in Federal Republic of Germany.

The Company is the leading fixed line service provider while T-Mobile Macedonia AD (hereinafter referred as: "the subsidiary") is the leading mobile service provider in Macedonia. e-Makedonija is a foundation, established to support application and development of information technology in Macedonia.

The Macedonian telecommunications sector is regulated by the Electronic Communications Law ("ECL") enacted in March 2005. Under the ECL, the Company has been designated as a Significant Market Power operator ("SMP") in the market for fixed line voice telephone networks and services, including the market for access to the networks for data transmission and leased lines.

In January 2012 changes of ECL were published, with main focus on presentation ("CLIP") and location for emergency call, annual fees for the Agency for Electronic Communications ("the Agency"), measurement of quality parameters, free SMS's for national and culture heritage from all operators and IP exchange development. The Company and other operators and service providers are paying an annual fee in amount of 0.5% from the annual revenue of the operator or service provider realised with the use of public communication network and provision of public communication services during previous year (or the part of the year when the operator or service provider started with its commercial services), but not more than 250,000 EUR. The Agency is developing general strategy for the period of next 5 years (2012-2017). Publishing of the official document for the Agency strategy is expected by the end of the first quarter in 2012.

On 29 June 2011 the Company was designated as Universal Services ("US") provider for fixed telephone services, public payphones and equivalent access for disabled end users. The Company started providing the services as of 1 January 2012 and is obliged to do so for the following 5 years.

The Company has a cost based price obligation for the Regulated wholesale services, using Long Run Incremental Costs methodology ("LRIC"). During December 2010, the Agency published results from its own developed LRIC Bottom – up costing model. The results from the costing model are implemented as of 1 April 2011 which implies with reduction of the monthly fee for Unbundled Local Loop ("ULL") and interconnection rates (for origination, termination and transit), as well the monthly fees for interconnection links and collocation.

Based on the Agency analysis for the relevant markets 1-6 related to fixed voice retail services and the program of the Agency for 2011, the Agency with engaged consultants started the process for development and implementation of the methodology for retail price regulation in October 2011. These activities will result in more intensive regulation on the Company retail fees.

On 14 October 2011 the Agency presented detailed plan for Bottom – up LRIC model developed by consultants which is expected to result in changes of Bit Stream Access ("BSA") pricing models and will modify service description.

In line with the PSTN migration of the Company's network, the Agency approved proposed modifications of the Company's Wholesale Offers (processes, technical conditions and prices) applicable as of 1 January 2012.

As of November 2011 the Company introduced its retail ADSL service on standalone basis (so called Naked DSL). Customers are not obliged to have PSTN subscription anymore. The same service will be offered on the wholesale level as well.

Initial light FTTx regulation was introduced in the second quarter in 2011 with the imposed obligation for Referent Access Offer for ducts and dark fibre imposed on the Company by the Agency. New reference offer for access to the Company network (for ducts and dark fibre) was introduced in December 2011. Agency announced development of Bottom – up LRIC model by consultants for ducts, dark fibre and leased lines also.

Notes to the consolidated financial statements

As of September 2011 new number portability procedures are applied for all operators in Macedonia. The entire exchange of the data on number portability between the operators is implemented through the central database ("CDB") and shorter deadlines are implemented in fixed network (2 days for porting) and mobile network (1 days for porting) accordingly. The Company and its subsidiary introduced beep signal informing its customers their call is towards ported number as of 1 September 2011. The signal is unified for all operators.

Based on the second round analysis on Market 16 and LRIC cost model, Mobile Termination Rate ("MTR") has been defined with a glide path decrease in a four years time frame (until 2013). As of September 2011 the price for the national MTR is decreased to 3.1 MKD and will continue decreasing for 0.1 MKD each year down to 2.9 MKD/min in September 2013. At the same time current MTR's for ONE and VIP are 3.4 MKD/min and 4.6 MKD/min respectively which will decrease to equal MTR of 2.9 MKD in September 2013.

SMS termination service is officially regulated at level of 2MKD/SMS.

On 13 October 2011 the Agency announced public call for LTE (790 – 862 MHz frequency band). In December 2011 the subsidiary sent to Agency an express of interest for the license.

Starting with August 2006, the Company has more than 100 shareholders, as a result of the sale of Governmental shares through auction organized by the Government during June 2006. According to the Law on securities it qualifies as company with special reporting obligations, which mainly, encompasses provision of quarterly, semi-annual and annual financial information to the Securities Exchange Commission of the Republic of Macedonia.

The Company's registered address is "Orce Nikolov" Street bb, 1000, Skopje, Republic of Macedonia. The average number of employees during 2011 was 1,670 (2010: 1,726).

1.2. Investigation into certain consultancy contracts

On 13 February 2006, Magyar Telekom Plc., the controlling owner of the Company, (via Stonebridge Communications AD - Skopje (under liquidation), majority shareholder of the Company), announced that it was investigating certain contracts entered into by another subsidiary of Magyar Telekom Plc. to determine whether the contracts were entered into in violation of Magyar Telekom Plc. policy or applicable law or regulation. Magyar Telekom's Audit Committee retained White & Case, as its independent legal counsel to conduct the internal investigation. Subsequent to this on 19 February 2007, the Board of Directors of the Company, based on the recommendation of the Audit Committee of the Company and the Audit Committee of Magyar Telekom Plc., adopted a resolution to conduct an independent internal investigation regarding certain contracts in Macedonia.

Based on publicly available information, as well as information obtained from Magyar Telekom and as previously disclosed, Magyar Telekom's Audit Committee conducted an internal investigation regarding certain contracts relating to the activities of Magyar Telekom and/or its affiliates in Montenegro and Macedonia that totalled more than EUR 31 million. In particular, the internal investigation examined whether Magyar Telekom and/or its Montenegrin and Macedonian affiliates had made payments prohibited by U.S. laws or regulations, including the U.S. Foreign Corrupt Practices Act (the "FCPA"). The Company has previously disclosed the results of the internal investigation.

Magyar Telekom's Audit Committee informed the U.S. Department of Justice (the "DOJ") and the U.S. Securities and Exchange Commission (the "SEC") of the internal investigation. The DOJ and the SEC commenced investigations into the activities that were the subject of the internal investigation. For further information about the internal investigation, please refer to the financial statements of the Company for the year ended 31 December 2010.

In 2011, Magyar Telekom entered into final settlements with the DOJ and the SEC to resolve the DOJ's and the SEC's investigations relating to Magyar Telekom. The settlements concluded the DOJ's and the SEC's investigations.

Magyar Telekom has entered into a two-year deferred prosecution agreement (the "DPA") with the DOJ, under which Magyar Telekom was charged with a violation of the anti-bribery provisions of the FCPA and two violations of the books and records provisions of the FCPA. In accordance with the DPA, on 29 December 2011, the DOJ filed a criminal information (the "Information") setting out these charges in the U.S. District Court for the Eastern District of Virginia. Magyar Telekom has agreed to admit to the DOJ's allegations and to acknowledge responsibility for the acts as charged in the Information. Magyar Telekom has agreed to pay a criminal penalty of USD 59.6 million to cooperate with the DOJ in future investigations, to refrain from any violations of U.S. federal criminal law, to continue to operate a compliance program and to report to the DOJ annually regarding the compliance program during the term of the DPA. The DOJ will seek to dismiss the charges upon conclusion of the two-year term, unless Magyar Telekom violates the terms of the DPA.

Notes to the consolidated financial statements

On 29 December 2011, the SEC filed in the U.S. District Court for the Southern District of New York a Complaint (the "Complaint") and a proposed Final Judgment against Magyar Telekom (the "Final Judgment"). Without admitting or denying the allegations in the Complaint, Magyar Telekom consented to the filing of the Complaint and entry of the Final Judgment to resolve the SEC's investigation. The Complaint alleged civil violations of the FCPA's anti-bribery, books and records and internal control provisions. The Final Judgment, which was approved by the U.S. District Court for the Southern District of New York on 3 January 2012, permanently enjoined Magyar Telekom from violating these provisions and required Magyar Telekom to pay USD 25.2 million for disgorgement of profits and USD 6.0 million of prejudgment interest thereon.

The final settlements recognize the DOJ's and the SEC's consideration of Magyar Telekom's self-reporting, thorough internal investigation, remediation and cooperation with the DOJ's and the SEC's investigations. Magyar Telekom has undertaken several remedial measures to address the issues identified during the course of these investigations. These measures include steps designed to revise and enhance Magyar Telekom's internal controls, as well as the establishment of the Corporate Compliance Program. The Corporate Compliance Program promotes awareness of Magyar Telekom's compliance policies and procedures through training, the operation of a whistleblower hotline, and monitoring of, and communications with, employees and subsidiaries of Magyar Telekom. Magyar Telekom remains fully committed to responsible corporate behaviour.

On 6 January 2012 Magyar Telekom paid a criminal penalty of USD 59.6 million pursuant to the settlement with the DOJ and on 23 January 2012 Magyar Telekom paid USD 25.2 million for disgorgement of profits and USD 6.0 million of prejudgment interest pursuant to the settlement with the SEC, totalling USD 90.8 million paid with respect to the settlements with the DOJ and the SEC.

The above-referenced settlement by Magyar Telekom and associated liability was not recorded in the consolidated financial statements of the Group. These amounts were reflected in the consolidated financial statements of Magyar Telekom and are not reflected in the consolidated financial statements of the Company.

According to the information provided to the Company by Magyar Telekom Plc., on 2 December 2009, the Audit Committee of Magyar Telekom Plc., provided the Magyar Telekom's Board of Directors with a "Report of Investigation to the Audit Committee of Magyar Telekom Plc." dated 30 November 2009 (the "Final Report").

In relation to the issuance of the Final Report and the information provided to the Company by Magyar Telekom, in January 2010 the Chairman of the Company's Board of Directors requested third party legal and tax expertise for assessment of the potential accounting and tax implications arising from the transactions conducted by the Company and its subsidiary subject to the Final Report.

The external experts prepared reports (the "Reports") on their assessment and submitted the Reports to the Chairman of the Company's BoD and the Management of the Company and its subsidiary accordingly. As a result, based on the analysis of the Tax and Legal experts and information available to the Management related to the transactions subject of the Final Report, amount of MKD 248,379 thousand has been identified as potential tax impact (together with related penalty interest) as of 31 December 2009 arising from the transactions conducted by the Company and its subsidiary subject to the Final Report. In 2010 the amount related to the identified potential tax impact (together with related penalty interest) amounted to MKD 261,834 thousand out of which MKD 227,972 thousand related to the Company were paid in 2010 upon an executive decision issued by the Public Revenue Office. In the subsidiary, as of 31 December 2011 the amount related to the identified potential tax impact (together with related penalty interest) amounted to MKD 36,019 thousand (see note 14). In addition, the value of one contract MKD 105,147 thousand capitalised within treasury shares was corrected in 2009 consolidated financial statements and was accounted for as though these payments had been expensed in 2006 rather than capitalized as part of treasury shares as originally reported. The other contracts that were identified by the Final Report and the reports of the tax and legal experts related to transactions undertaken by the Company and its subsidiary were expensed in the related periods (2001-2007).

In May 2008, the Ministry of Interior ("MOI") of the Republic of Macedonia ("RoM") submitted to the Company an official written request for information and documentation regarding certain payments for consultancy services and advance dividend, as well as certain procurements and contracts. In June 2008 the Company submitted copies from the requested documents. In the same period, T-Mobile Macedonia has also received similar requests for provision of certain documentation to the Ministry of Interior of RM and they were submitted accordingly.

In October 2008 the Investigation Judge from the Primary Court Skopje 1 – Skopje (the criminal court), has issued an official written order to the Company to handover certain original documentation. Later in October 2008, the Company officially and personally handed over the requested documentation. Additional MOI requests in written were submitted and the Company provided the requested documentation.

Notes to the consolidated financial statements

We understand, based on public information available as of 10 December 2008, that the MOI Organized Crime Department submitted the files to the Basic Public Prosecution Office of Organized Crime and Corruption, with a proposal to bring criminal charges against Attila Szendrei (former CEO of Makedonski Telekom AD - Skopje), Rolf Plath (former CFO of Makedonski Telekom AD - Skopje), Mihail Kefaloyannis (former member of the Board of Directors in Stonebridge and former member of the Board of Directors in Telemacedonia) and Zoltan Kisjuhász (former CEO of Stonebridge and former non-executive member of the Board of Directors of Makedonski Telekom AD - Skopje) on the account of a reasonable doubt for committed criminal act. These individuals are proposed to be charged with having “abuse of office and authorizations” in their position in Makedonski Telekom AD - Skopje by concluding consultancy contracts for which there was no intention or need for any services in return.

The Primary Court Skopje 1 in Skopje, Investigative Department for Organized Crime delivered a summon to the Company in connection with the criminal charges against the above stated persons and asked for a statement whether the Company has suffered any damages on the basis of the said consultancy contracts.

After several postponements of the court hearing related to the investigation procedure handled in the Primary Court Skopje 1 Skopje, on the hearing held on 13 April 2009, the representatives of Makedonski Telekom AD Skopje declared the position of the Company that taking into consideration the ongoing independent internal investigation conducted by White & Case, approved by the Company's BoD, it was premature to preannounce any damage which may be caused by means of the implementation of the mentioned contracts or with reference to them. An expertise was performed on 11 May 2010 and the experts from Ministry of Justice of the Republic of Macedonia – Court Expertise Office – Skopje, asked for some additional documents from Company's side in order to prepare the expertise. The experts asked additional information related to certain agreements concluded in 2005 and 2006, and related invoices. The Company has collected and submitted requested information/documentation to the Court Expertise Office on 1 November 2010.

On 14 March 2011, the Company received from the Primary Court Skopje 1 a copy of the “Finding and Opinion”, dated November 2010, issued by the Bureau of Judicial Expertise to the Primary Court Skopje 1 as a result of the expertise procedure. The “Finding and Opinion” addresses and contains conclusions regarding five contracts entered into with Chaptex and Cosmotelco in 2005 and 2006 and formerly reviewed by the Audit Committee of Magyar Telekom. The “Finding and Opinion” concludes that, based on these contracts, expenditures in the amount of EUR 3.975 million were made by the Company and Stonebridge to Chaptex “without evidence for performed services”; accordingly, shareholders of the Company and Stonebridge in the proportion of their shareholding, suffered damages in the aforementioned aggregate amount as result of decreased proceeds for payment of dividend in 2005 and 2006.

Based on publically available information, we understand that the Public Prosecutor has filed an indictment in 2011 against Mr. Szendrei, Mr. Kisjuhász and Mr. Plath, but not against Mr. Kefaloyannis. The court hearing has taken place at the end of 2011, but it was postponed since the court could not provide presence of any of the defendants. The Company, as damaged party in this case, has not received official court invitation for the hearing.

Pursuant to the questions posed by the investigative judge, it could be concluded that the public prosecutor has addressed the Company as party damaged by the actions of the defendants. However, based on the content of the order for expertise issued by the investigative judge, and on the basis of the expert opinion, it can be concluded that now damaged parties are shareholders of the Company (Stonebridge AD Skopje, Republic of Macedonia and minority shareholders) and therefore the state budget, as the Republic of Macedonia is a shareholder in the Company. Therefore, the public prosecutor should clear out who is considered as damage party in this particular case, which is of significant importance for the position of the Company in this proceeding and its further actions. At the moment there aren't any indications that the Company could be found liable and made to pay any penalties or fines for the criminal procedure which is initiated against the individuals.

We have not become aware of any information as a result of a request from any regulators or other external parties, other than as described above, from which we have concluded that the financial statements may be misstated, including from the effects of a possible illegal act.

Notes to the consolidated financial statements

2. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1. Basis of preparation

The consolidated financial statements of Makedonski Telekom AD – Skopje have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

The consolidated financial statements are presented in Macedonian denars rounded to the nearest thousand.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4. Actual results may differ from those estimated.

2.1.1. Standards, amendments and interpretations effective and adopted by the Group in 2011

- IAS 24 (revised) Related Party Disclosures. In November 2009, the IASB issued a revised version of IAS 24 Related Party Disclosures. Until now, if a government controlled, or significantly influenced, an entity, the entity was required to disclose information about all transactions with other entities controlled, or significantly influenced by the same government. The revised standard still requires disclosures that are important to users of financial statements but eliminates requirements to disclose information that is costly to gather and of less value to users. It achieves this balance by requiring disclosure about these transactions only if they are individually or collectively significant. Furthermore the IASB has simplified the definition of related party and removed inconsistencies. The Group adopted the revised standard as of 1 January 2011. As the Group in 2011 does not have transactions that are individually or collectively material with companies controlled by the Government of Republic of Macedonia, the revised standard did not have a significant impact on the disclosures in the Group's financial statements.

2.1.2. Standards, amendments and interpretations effective in 2011 but not relevant for the Group

- IAS 32 (amended) Financial Instruments. The IASB published an amendment to IAS 32 Financial Instruments: Presentation in October 2009. The amendment clarifies the classification of rights issues as equity or liabilities for rights issues that are denominated in a currency other than the functional currency of the issuer. These rights issues are recorded as derivative liabilities before the amendment. The amendment requires that such right issues offered pro rata to all of an entity's existing shareholders are classified as equity. The classification is independent of the currency in which the exercise price is denominated. The amendment did not have any impact on the Group's financial statements as the Group has no such instruments.
- IFRS 1 The IASB amended IFRS 1 in January 2010 and in December 2010. As the Group has been reporting according to IFRS for many years, neither the original standard, nor any revision to that is relevant for the Group.
- IFRIC 14 (amended) IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. In November 2009, the IASB issued an amendment to IFRIC 14, which corrects an unintended consequence of IFRIC 14. Without the amendments, in some circumstances entities are not permitted to recognize some voluntary prepayments for minimum funding contributions as an asset. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amended interpretation is not applicable to the Group as the Group has no funded defined post-retirement benefit schemes.
- IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments. This interpretation issued in November 2009 clarifies the requirements of IFRSs when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially. The interpretation did not have any impact on the Group's financial statements as the Group does not extinguish any of its financial liabilities with equity instruments.

Notes to the consolidated financial statements

2.1.3. Standards, amendments and interpretations that are not yet effective and have not been early adopted by the Group

- IAS 1 (amended). The IASB published amendments to IAS 1 Presentation of Financial Statements in June 2011. The amendments to IAS 1 retain the 'one or two statement' approach at the option of the entity and only revise the way other comprehensive income is presented: requiring separate subtotals for those elements which may be reclassified to the profit or loss section of the income statement (recycled) and those elements that will not. The application of the amendment is required for annual periods beginning on or after 1 July 2012.
- IAS 19 (amended). The IASB published amendments to IAS 19 - Employee Benefits in June 2011. The amendments focus on the following key areas:
 - Recognition (only defined benefit plans) - elimination of the "corridor approach"
 - Presentation (only defined benefit plans) - gains and losses that arises from re-measurements should be presented (only) in other comprehensive income (elimination of the remaining options)
 - Disclosures - enhancing of disclosure requirements, e.g.
 - the characteristics of a company's defined benefit plans,
 - amounts recognized in the financial statements,
 - risks arising from defined benefit plans and
 - participation in multi-employer plans
 - Improved / clarified guidance relating to several areas of the standard, e.g.
 - classification of benefits,
 - recognition of termination benefits and
 - interest rate relating to the expected return on the plan assets

The application of the amendment is required for annual periods beginning on or after 1 January 2013. We do not expect that the adoption of the amended standard would result in significant changes in the financial statements of the Group.

- IFRS 7 (amended). The IASB published an amendment to IFRS 7 Amendments to IFRS 7 Financial Instruments: Disclosures in October 2010. The amendment requires quantitative and qualitative disclosures regarding transfers of financial assets that do not result in entire derecognition, or that result in continuing involvement. This is intended to allow users of financial statements to improve their understanding of such transactions (for example, securitizations), including understanding the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of such transactions are undertaken around the end of a reporting period. The application of the amendment is required for annual periods beginning on or after 1 July 2011. An earlier application is permitted. We do not expect that the adoption of the amended standard would result in significant changes in the financial statements disclosures of the Group.
- IFRS 9 Financial Instruments. The standard forms the first part of a three-phase project to replace IAS 39 (Financial Instruments: Recognition and Measurement) with a new standard, to be known as IFRS 9 Financial Instruments. IFRS 9 prescribes the classification and measurement of financial assets and liabilities. The remaining phases of this project, dealing with the impairment of financial instruments and hedge accounting, as well as a further project regarding derecognition, are in progress.

Financial assets – At initial recognition, IFRS 9 requires financial assets to be measured at fair value. After initial recognition, financial assets continue to be measured in accordance with their classification under IFRS 9. Where a financial asset is classified and measured at amortized cost, it is required to be tested for impairment in accordance with the impairment requirements in IAS 39. IFRS 9 defines the below rules for classification.

- IFRS 9 requires that financial assets are classified as subsequently measured at either amortized cost or fair value. There are two conditions needed to be satisfied to classify financial assets at amortized cost: (1) The objective of an entity's business model for managing financial assets has to be to hold assets in order to collect contractual cash flows; and (2) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely

Notes to the consolidated financial statements

payments of principal and interest on the principal amount outstanding. Where either of these conditions is not satisfied, financial assets are classified at fair value.

- Fair Value Option: IFRS 9 permits an entity to designate an instrument, that would otherwise have been classified in the amortized cost category, to be at fair value through profit or loss if that designation eliminates or significantly reduces a measurement or recognition inconsistency ('accounting mismatch').
- Equity instruments: The default category for equity instruments is at fair value through profit or loss. However, the standard states that an entity can make an irrevocable election at initial recognition to present all fair value changes for equity investments not held for trading in other comprehensive income. These fair value gains or losses are not reported as part of a reporting entity's profit or loss, even when a gain or loss is realized. Only dividends received from these investments are reported in profit or loss.
- Embedded derivatives: The requirements in IAS 39 for embedded derivatives have been changed by no longer requiring that embedded derivatives be separated from financial asset host contracts.
- Reclassification: IFRS 9 requires reclassification between fair value and amortized cost when, and only when there is a change in the entity's business model. The 'tainting rules' in IAS 39 have been eliminated.

Financial liabilities – IFRS 9 "Financial Instruments" sets the requirements on the accounting for financial liabilities and replaces the respective rules in IAS 39 "Financial Instruments: Recognition and Measurement". The new pronouncement:

- Carries forward the IAS 39 rules for the recognition and derecognition unchanged.
- Carries forward most of the requirements in IAS 39 for classification and measurement.
- Eliminates the exception from fair value measurement for derivative liabilities that are linked to and must be settled by delivery of an unquoted equity instrument.
- Changes the requirements related to the fair value option for financial liabilities to address own credit risk.

An entity shall apply IFRS 9 for annual periods beginning on or after 1 January 2015. Earlier adoption is permitted. A reporting entity must apply IFRS 9 retrospectively. For entities that adopt IFRS 9 for periods before 1 January 2012 the IFRS provides transition relief from restating comparative information. The Group is currently analysing the possible changes in the financial statements of the Group that will be a result of the adoption of the new standard.

- IFRS 10, IFRS 11, IFRS 12, IAS 27 (amended) and IAS 28 (amended). The IASB published IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements, IFRS 12 Disclosures of Interests in Other Entities and amendments to IAS 27 Separate Financial Statements and IAS 28 Investments in Associates and Joint Ventures in May 2011.

IFRS 10 replaces the consolidation guidance in IAS 27 Consolidated and Separate Financial Statements and SIC-12 Consolidation – Special Purpose Entities by introducing a single consolidation model for all entities based on control, irrespective of the nature of the investee (i.e., whether an entity is controlled through voting rights of investors or through other contractual arrangements as is common in special purpose entities). Under IFRS 10, control is based on whether an investor has:

- power over the investee;
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect the amount of the returns.

IFRS 11 introduces new accounting requirements for joint arrangements, replacing IAS 31 Interests in Joint Ventures. The option to apply the proportional consolidation method when accounting for jointly controlled entities is removed. Additionally, IFRS 11 eliminates jointly controlled assets to now only differentiate between joint operations and joint ventures. A joint operation is a joint arrangement whereby the parties that have joint control have rights to the assets and obligations for the liabilities. A joint venture is a joint arrangement, whereby the parties that have joint control have rights to the net assets.

IFRS 12 will require enhanced disclosures about both consolidated entities and unconsolidated entities in which an entity has involvement. The objective of IFRS 12 is to require information so that financial statement users may evaluate the basis of control, any restrictions on consolidated assets and liabilities, risk exposures arising from involvements with

Notes to the consolidated financial statements

unconsolidated structured entities and non-controlling interest holders' involvement in the activities of consolidated entities.

The requirements relating to separate financial statements are unchanged and are included in the amended IAS 27 Separate Financial Statements. The other portions of IAS 27 are replaced by IFRS 10.

IAS 28 Investments in Associates and Joint Ventures is amended for conforming changes based on the issuance of IFRS 10, IFRS 11 and IFRS 12.

An entity shall apply this package of five new and revised standards for annual periods beginning on or after 1 January 2013. We do not expect that their adoption would result in significant changes in the financial statements of the Group.

- IFRS 13 The IASB published IFRS 13 Fair Value Measurement in May 2011 in order to replace the guidance on fair value measurement in existing IFRS accounting literature with a single standard. The IFRS is the result of joint efforts by the IASB and FASB to develop a converged fair value framework. IFRS 13 defines fair value, provides guidance on how to determine fair value and requires disclosures about fair value measurements. However, IFRS 13 does not change the requirements regarding which items should be measured or disclosed at fair value. IFRS 13 seeks to increase consistency and comparability in fair value measurements and related disclosures through a 'fair value hierarchy'. The hierarchy categorizes the inputs used in valuation techniques into three levels. The hierarchy gives the highest priority to (unadjusted) quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. If the inputs used to measure fair value are categorized into different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety in the level of the lowest level input that is significant to the entire measurement (based on the application of judgment). The new standard should be applied for annual periods beginning on or after 1 January 2013. Earlier application is permitted. We do not expect that the adoption of the new standard would result in significant changes in the financial statements of the Group.

2.1.4. Standards, amendments and interpretations that are not yet effective and not relevant for the Group's operations

- IAS 12 (amended). In December 2010, the IASB issued the pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12". The new pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12" sets presumptions for the recovery (e.g. use or sale) of certain assets. This is relevant in cases where the type of recovery has different tax consequences. The pronouncement sets the rebuttable presumption that the carrying amount of investment property that is measured using the fair value model in IAS 40 will be recovered through sale. Moreover, the carrying amount of a non-depreciable asset measured using the revaluation model in IAS 16 is always deemed to be recovered through sale. The amendment supersedes SIC 21 and shall be applied for annual periods beginning on or after 1 January 2012. Earlier application is permitted. As the Group does not have investment properties or non-depreciable asset measured using the revaluation model in IAS 16, the amended standard will not have any impact on the Group's financial statements.
- IFRIC 20 In October 2011, the IASB published IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine. The interpretation shall be applied for annual periods beginning on or after 1 January 2013. Earlier application is permitted. As the Group does not have mining activity, the interpretation will not have any impact on the Group's financial statements.

2.2. Consolidation

2.2.1. Subsidiaries

Subsidiaries are those enterprises controlled by the Company. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an enterprise, generally accompanying a shareholding of more than half of the voting rights, so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Intra-group balances and transactions, and any unrealised gains arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Notes to the consolidated financial statements

The subsidiaries of the Company and the ownership interest are presented below:

	Country of incorporation	Ownership interest As at 31 December 2011	Ownership interest As at 31 December 2010
T-Mobile Macedonia AD	Macedonia	100	100
e-Makedonija	Macedonia	100	100

2.3. Foreign currency translation

2.3.1. Functional and presentation currency

The consolidated financial statements are presented in thousands of Macedonian denars, which is the Company's functional and presentation currency.

2.3.2. Transactions and balances

Transactions in foreign currencies are translated to denars at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the financial statement date are translated to denars at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognized in the Profit for the year (Finance income/expenses). Non-monetary financial assets and liabilities denominated in foreign currency are translated to denars at the foreign exchange rate ruling at the date of transaction.

The foreign currencies deals of the Group are predominantly EURO (EUR) and United States Dollars (USD), based. The exchange rates used for translation at 31 December 2011 and 31 December 2010 were as follows:

	2011 MKD	2010 MKD
1 USD	47.53	46.31
1 EUR	61.51	61.51

2.4. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets of the Group include, cash and cash equivalents, deposits with banks, equity instruments of another entity (available-for-sale and at fair value through profit or loss) and contractual rights to receive cash (trade and other receivables) or another financial asset from another entity.

Financial liabilities of the Group include liabilities that originate from contractual obligations to deliver cash or another financial asset to another entity (non-derivatives). In particular, financial liabilities include trade and other payables.

2.4.1. Financial assets

The Group classifies its financial assets in the following categories:

- (a) financial assets at fair value through profit or loss
- (b) loans and receivables
- (c) available-for-sale financial assets (AFS)

The classification depends on the purpose for which the financial asset was acquired. Management determines the classification of financial assets at their initial recognition.

Regular way purchases and sales of financial assets are recognized on the trade-date, the date on which the Group commits to purchase or sell the asset. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the Profit for the year.

Notes to the consolidated financial statements

The Group assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Impairment losses of financial assets are recognized in the Profit for the year against allowance accounts to reduce the carrying amount until the derecognition of the financial asset, when the net carrying amount (including any allowance for impairment) is derecognized from the Consolidated statement of financial position. Any gains or losses on derecognition are calculated and recognized as the difference between the proceeds from disposal and the (net) carrying amount derecognized.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

(a) Financial assets at fair value through profit or loss

This category comprises those financial assets designated at fair value through profit or loss at inception. A financial asset is classified in this category if the Group manages such asset and makes purchase and sale decisions based on its fair value in accordance with the Group investment strategy for keeping investments within portfolio until there are favourable market conditions for their sale.

'Financial assets at fair value through profit or loss' are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are recognized in the Profit for the year (Finance income/expenses) in the period in which they arise.

Dividend income from financial assets at fair value through profit or loss is recognized in the Profit for the year when the Group's right to receive payments is established and inflow of economic benefits is probable.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except those with maturities over 12 months after the financial statement date. These are classified as non-current assets.

The following items are assigned to the "loans and receivables" measurement category:

- cash and cash equivalents
- deposits with bank
- trade receivables
- other receivables
- employee loans
- receivables and loans to third parties

Loans and receivables are initially recognized at fair value and subsequently carried at amortized cost using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, call deposits held with banks and other short-term highly liquid investments with original maturities of three months or less.

Should an impairment on cash and cash equivalents occur, it would be recognized in the Profit for the year (Finance expenses).

Trade and other receivables

Trade and other receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy

Notes to the consolidated financial statements

or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired.

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the Profit for the year (Other operating expenses – Impairment losses on trade and other receivables).

The Group's policy for collective assessment of impairment is based on the ageing of the receivables due to the large number of relatively similar type of customers.

Individual valuation is carried out for the largest customers and international customers and also for customers under litigation and bankruptcy proceedings. In 2011 the Group performed detailed analysis of the customers' portfolios and included in the individual valuation also the customers of interconnection services. Itemized valuation is also performed in special circumstances.

When a trade receivable is established to be uncollectible, it is written off against the Profit for the Year (Other operating expenses – Impairment losses on trade and other receivables) with a parallel release of the cumulated impairment on the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against the recognized loss in the Profit for the year.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss shall be reversed by adjusting an allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed. The amount of the reversal shall be recognized in the Profit for the year as a reduction to Other operating expenses (Impairment losses on trade and other receivables).

Amounts due to, and receivable from, other network operators are shown net where a right of set-off exists and the amounts are settled on a net basis (such as receivables and payables related to international traffic).

Employee loans

Employee loans are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

Difference between the nominal value of the loan granted and the initial fair value of the employee loan is recognized as prepaid employee benefits. Interest income on the loan granted calculated by using the effective interest method is recognized as finance income, while the prepaid employee benefits are amortized to Personnel expenses evenly over the term of the loan.

Impairment losses on Employee loans, if any, are recognized in the Profit for the year (Personnel expenses).

(c) Available-for-sale financial assets (AFS)

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the financial statement date. Purchases and sales of investments are recognized on the trade-date – the date on which the Group commits to purchase or sell the asset.

Subsequent to initial recognition all available-for-sale financial assets are measured at fair value, except that any instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at cost, including transaction costs, less impairment losses. The intention of the Company is to dispose these assets when there are favourable market conditions for their sale. Changes in the fair value of financial assets classified as available for sale are recognized in equity. When financial assets classified as available for sale are sold or impaired, the accumulated fair value adjustments recognized in equity are included in the Profit for the year as gains and losses from investment securities.

The Group assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If any such evidence exists for AFS financial assets, the cumulative unrealized gain (if any) is reclassified from Other

Notes to the consolidated financial statements

comprehensive income to Profit for the year, and any remaining difference is also recognized in the Profit for the year (Finance income). Impairment losses recognized on equity instruments are not reversed through the Profit for the year.

When AFS financial assets are sold or redeemed, therefore derecognized, the fair value adjustments accumulated in equity are reclassified from Other comprehensive income to Profit for the year (Finance income).

2.4.2. Financial liabilities

Trade and other payables

Trade and other payables (including accruals) are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. The carrying values of trade and other payables approximate their fair values due to their short maturity.

2.5. Inventories

Inventories are stated at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

The cost of inventories is based on weighted average cost formula and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

Phone sets are often sold for less than cost in connection with promotions to obtain new subscribers with minimum commitment periods. Such loss on the sale of equipment is only recorded when the sale occurs as they are sold as part of a profitable service agreement with the customer and if the normal resale value is higher than the cost of the phone set. If the normal resale value is lower than costs, the difference is recognized as impairment immediately.

Impairment losses on Inventories are recognized in Other operating expenses (Write down of inventories to net realisable value).

2.6. Non-current assets held for sale

An asset is classified as held for sale if it is no longer needed for the future operations of the Group, and has been identified for sale, which is highly probable and expected to take place within 12 months. These assets are accounted for at the lower of carrying value or fair value less cost to sell. Depreciation is discontinued from the date of designation to the held for sale status. When an asset is designated for sale, and the fair value is determined to be lower than the carrying amount, the difference is recognized in the Profit for the year (Depreciation and amortisation) as an impairment loss.

2.7. Property, plant and equipment (PPE)

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses (see note 2.9).

The cost of an item of PPE comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the costs if the obligation incurred can be recognized as a provision according to IAS 37 – Provisions, Contingent Liabilities and Contingent Assets.

In 2011, Law on acting with illegally built facilities was enacted, according to which the subsidiary will incur certain expenditures related to obtaining complete documentation for base stations in accordance to applicable laws in Republic of Macedonia. The Group will capitalise those expenditures as incurred. No such expenditures occurred in 2011.

The cost of self-constructed assets includes the cost of materials and direct labour.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the Profit for the year during the financial period in which they are incurred.

When assets are scrapped, the cost and accumulated depreciation are removed from the accounts and the loss is recognized in the Profit for the year as depreciation expense.

Notes to the consolidated financial statements

When assets are sold, the cost and accumulated depreciation are removed from the accounts and any related gain or loss, determined by comparing proceeds with carrying amount, is recognized in the Profit for the year (Other operating income).

Depreciation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of items of property, plant and equipment. Assets are not depreciated until they are available for use. Land is not depreciated. The assets useful lives and residual values are reviewed, and adjusted if appropriate, at least once a year. For further details on the groups of assets impacted by the most recent useful life revisions see note 11.

The estimated useful lives are as follows:

	2011 Years	2010 Years
Buildings	20-40	20-40
Aerial and cable lines	20-25	20-25
Telephone exchanges	10	10
Base stations	10	10
Computers	4	4
Furniture and fittings	4-10	4-10
Vehicles	4-10	4-10
Other	2-15	2-15

2.8. Intangible assets

Intangible assets that are acquired by the Group are stated at cost less accumulated amortisation and impairment losses (see note 2.9).

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

The useful lives of concession and licenses are determined based on the underlying agreements and are amortized on a straight line basis over the period from availability of the frequency for commercial use until the end of the initial concession or license term. No renewal periods are considered in the determination of useful life (see note 12).

The estimated useful lives are as follows:

	2011 Years	2010 Years
Software and software licences	2-15	2-15
Concession	18	18
3G licence and 2G 1800 MHz licence	10	10

Amortisation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of intangible assets. Intangible assets are amortised from the date they are available for use. The assets useful lives are reviewed, and adjusted if appropriate, at least once a year.

In determining whether an asset that incorporates both intangible and tangible elements should be treated under IAS 16 - Property, Plant and Equipment or as an intangible asset under IAS 38 - Intangible Assets, management uses judgment to assess which element is more significant and recognizes the assets accordingly.

2.9. Impairment of PPE and intangible assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment.

Assets that are subject to amortisation or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units - CGUs).

Notes to the consolidated financial statements

Impairment losses are recognized in the Profit for the year (Depreciation and amortisation). Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

2.10. Provisions and contingent liabilities

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Provisions are measured and recorded as the best estimate of the expenditure required to settle the present obligation at the financial statement date. The estimate can be calculated as the weighted average of estimated potential outcomes or can also be the single most likely outcome. The provision charge is recognized in the Profit for the year within the expense corresponding to the nature of the provision.

No provision is recognized for contingent liabilities. A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

2.11. Share capital

Ordinary shares are classified as equity.

2.12. Treasury shares

When the Group purchases its equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes), is deducted from equity attributable to the Group's equity holders until the shares are cancelled or reissued. When such shares are subsequently reissued, any consideration received (net of any directly attributable incremental transaction costs and the related income tax effects) is included in equity attributable to the Group's equity holders.

2.13. Other reserves

Under local statutory legislation, the Group members are required to set aside 15 percent of its net statutory profit for the year in a statutory reserve until the level of the reserve reaches 1/5 of the share capital. These reserves are used to cover losses and are not distributed to shareholders except in the case of bankruptcy of the Group members.

2.14. Revenues

Revenues for all services and equipment sales (see note 16) are shown net of VAT, discounts and after elimination of sales within the Group. Revenue is recognized when the amount of the revenue can be reliably measured, and when it is probable that future economic benefits will flow to the Group and specific criteria of IAS18 on the sale of goods and rendering of services are met for the provision of each of the Group's services and sale of goods.

Customers of the Group are granted loyalty awards (credit points) based on their usage of the Group's services including timely payment of their invoices. Loyalty awards can be accumulated and redeemed to obtain future benefits (e.g. handsets, telecommunication equipment, etc.) from the operators of the Group. When customers earn their credit points, the fair value of the credit points earned are deducted from the revenue invoiced to the customer, and recognized as Other liabilities (deferred revenue). On redemption (or expiry) of the points, the deferred revenue is released to revenue as the customer collected (or waived) the undelivered element of the deemed bundle.

Revenues from operating leases are recognized on a straight line basis over the period the services are provided.

2.14.1. Fixed line and mobile telecommunications revenues

Revenue is primarily derived from services provided to customer subscribers and other third parties using telecommunications network, and equipment sales.

Notes to the consolidated financial statements

Customer subscriber arrangements typically include an equipment sale, subscription fee and charge for the actual voice, internet, data or multimedia services used. The Group considers the various elements of these arrangements to be separate earnings processes for IFRS purposes and recognizes the revenue for each of the deliverables using the residual method. These units are identified and separated, since they have value on a standalone basis and are sold not only in a bundle, but separately as well. Therefore the Group recognizes revenues for all of these elements using the residual method that is the amount of consideration allocated to the delivered elements of the arrangements equals the total consideration less the fair value of the undelivered elements.

The Group provides customers with narrow and broadband access to its fixed, mobile and TV distribution networks. Service revenues are recognized when the services are provided in accordance with contractual terms and conditions. Airtime revenue is recognized based upon minutes of use and contracted fees less credits and adjustments for discounts, while subscription and flat rate revenues are recognized in the period they relate to.

Revenue and expenses associated with the sale of telecommunications equipment and accessories are recognized when the products are delivered, provided there are no unfulfilled company obligations that affect the customer's final acceptance of the arrangement.

Revenues from premium rate services (voice and non-voice) are recognized on a gross basis when the delivery of the service over the network is the responsibility of the Group, the Group establishes the prices of these services and bears substantial risks of these services, otherwise presented on a net basis.

Customers may also purchase prepaid mobile, public phone and internet credits ("prepaid cards") which allow those customers to use the telecommunication network for a selected amount of time. Customers must pay for such services at the date when the card is purchased. Revenues from the sale of prepaid cards are recognized when used by the customers or when the cards expired with unused traffic.

Third parties using the telecommunications network include roaming customers of other service providers and other telecommunications providers which terminate or transit calls on the network. These wholesale (incoming) traffic revenues are recognized in the period of related usage. A proportion of the revenue received is often paid to other operators (interconnect) for the use of their networks, where applicable. The revenues and costs of these terminate or transit calls are stated gross in these consolidated financial statements as the Group is the principal supplier of these services using its own network freely defining the pricing of the service, and recognized in the period of related usage.

2.14.2. System integration and IT revenues

Contracts for network services consist of the installation and operation of communication networks for customers. Revenues for voice and data services are recognized under such contracts when used by the customer.

Revenue from system integration contracts requiring the delivery of customized products and/or services is generally covered by fixed-price contracts and revenue is recognized based on percentage of completion taking into account the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs.

Revenue from hardware and sales is recognized when the risk of ownership is substantially transferred to the customer, provided there are no unfulfilled obligations that affect the customer's final acceptance of the arrangement. Any costs of these obligations are recognized when the corresponding revenue is recognized.

Revenues from construction contracts are accounted for using the percentage-of-completion method. The stage of completion is determined on the basis of the costs incurred to date as a proportion of the estimated total costs. Receivables from construction contracts are classified in the Consolidated statement of financial position as Trade and other receivables.

2.15. Employee benefits

2.15.1. Short term employee benefits and pensions

The Group, in the normal course of business, makes payments on behalf of its employees for pensions, health care, employment and personnel tax which are calculated according to the statutory rates in force during the year, based on gross salaries and wages. Holiday allowances are also calculated according to the local legislation. The Group makes these contributions to the Governmental and private funds. The cost of these payments is charged to the Profit for the year in the same period as the related salary cost. No provision is created for holiday allowances for non-used holidays as according the local legislation the employer is obliged to provide condition for usage, and the employee to use the annual holiday within one

Notes to the consolidated financial statements

year. This is also exercised as Group policy and according the historical data employees use their annual holiday within the one year legal limit. The Group does not operate any other pension scheme or post retirement benefits plan and consequently, has no obligation in respect of pensions. The Group has a legal obligation to pay to employees two average monthly salaries in Republic of Macedonia at their retirement date, for which appropriate liability is recognized in the consolidated financial statements measured at the present value of two average monthly salaries together with adjustments incorporated in the actuarial calculation. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality bonds that are denominated in the currency in which the benefits will be paid. In addition, the Group is not obligated to provide further benefits to current and former employees.

2.15.2. Bonus plans

The Group recognizes a liability and an expense for bonuses taking into consideration the financial and operational results. The Group recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.15.3. Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the nominal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without the possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy.

2.16. Marketing expenses

Marketing costs are expensed as incurred. Marketing expenses are disclosed in note 18.

2.17. Income taxes

2.17.1. Income tax

Companies do not have to pay income tax on their profit before tax (earned since 1 January 2009) until that profit is distributed in a form of dividend or other forms of profit distributions. If dividend is paid, 10% income tax is payable at the moment of the dividend payment, regardless of whether in monetary or non-monetary form, to the foreign non resident legal entities and, foreign and domestic individuals. The dividends paid out to the resident legal entities are tax exempted. Apart of distribution of dividends, the tax is still payable on the non-deductable expenses incurred in that fiscal year, decreased by the amount of tax credits and other tax reliefs (see note 2.18).

2.17.2. Deferred income tax

Due to the changes in the Macedonian tax legislation effective from 1 January 2009, the tax rate for undistributed profits was effectively reduced to zero, as tax is only payable when profits are distributed. According IAS 12.52A, deferred tax assets and liabilities should be measured using the undistributed rate. This resulted in reversal of part of the deferred tax asset and all deferred tax liability balances as of 31 December 2009, and reversal of all deferred tax assets as of 31 December 2010. In line with the requirements of SIC 25, the Group accounted the impact of this change in the profit and loss in 2009 and 2010, respectively.

2.18. Tax on non-deductable expenses

At the end of fiscal year the companies are liable to pay tax on non deductible expenses, regardless of their financial results. The basis is expenses which are not within the scope of the company business i.e. non deductible expenses (representation expenses, provisions, gifts etc) less tax credits and other tax reliefs. The tax on non-deductable expenses is recognized in the Profit for the year (Other operating expenses) against Other taxes (see note 8).

Notes to the consolidated financial statements

2.19. Leases

2.19.1. Operating lease – Group as lessor

Assets leased to customers under operating leases are included in Property, plant and equipment in the Consolidated statement of financial position. They are depreciated over their expected useful lives on a basis consistent with similar fixed assets. Rental income is recognized on a straight-line basis over the lease term.

2.19.2. Operating lease – Group as lessee

Costs in respect of operating leases are charged to the Profit for the year on a straight-line basis over the lease term.

2.20. Earnings per share

Basic earnings per share is calculated by dividing profit attributable to the equity holders of the Company for the period by the weighted average number of common stocks outstanding.

2.21. Dividend distribution

Dividends are recognized as a liability and debited against equity in the Group's financial statements in the period in which they are approved by the Company's shareholders.

2.22. Segments

The operating segments of the Group are based on the business lines, fixed line and mobile, which is consistent with the internal reporting provided to the chief operating decision maker, the Chief Executive Officer (CEO), who is advised by the Group Management Committee (GMC) of the Company. The CEO is responsible for allocating resources to, and assessing the performance of, the operating segments. The accounting policies and measurement principles of the operating segments are the same as those applied for the Group described in the Significant accounting policies (see note 2). In the financial statements, the Group's segments are reported in a manner consistent with the internal reporting. The two operating segments, fixed line and mobile, are represented by the two separate legal entities, Makedonski Telekom AD – Skopje and T-Mobile AD Skopje, respectively.

The operating segments' revenues include revenues from external customers as well as the internal revenues generated from other segments. The operating segments, being two separate legal entities, charge revenues for the services delivered to the other operating segments identically as for external customers.

The operating segments' results are monitored by the CEO and the GMC to EBITDA (Earnings before interest, tax, depreciation and amortisation), which is defined by the Group as Operating profit without Depreciation and amortisation expense.

Another important KPI monitored at segment level is capital expenditure (Capex), which is determined as the additions to PPE and Intangible assets.

2.23. Comparative information

The comparative information as presented in these consolidated financial statements is consistent with the current year presentation and no items have been reclassified for comparative purposes.

3. FINANCIAL RISK MANAGEMENT

3.1. Financial risk factors

The Group does not apply hedge accounting for its financial instruments, all gains and losses are recognized in the Profit for the year except financial assets classified as available for sale that are recognized in Other comprehensive income. The Group is exposed in particular to credit risks related to its financial assets and risks from movements in exchange rates, interest rates, and market prices that affect its assets and liabilities. Financial risk management aims to limit these market risks through ongoing operational and finance activities.

Notes to the consolidated financial statements

The detailed descriptions of risks, the management thereof as well as sensitivity analyses are provided below. Sensitivity analyses include potential changes in profit before tax. The potential impacts disclosed (less tax) are also applicable to the Group's Equity.

3.1.1. Market risk

Market risk is defined as the 'risk that the fair value or value or future cash flows of a financial instrument will fluctuate because of changes in market prices' and includes interest rate risk, currency risk and other price risk.

As the vast majority of the revenues and expenses of the Group arise in MKD, the functional currency of the Company and of all Group entities is MKD, and as a result, the Group objective is to minimize the level of its financial risk in MKD terms.

For the presentation of market risks, IFRS 7 requires sensitivity analyses that show the effects of hypothetical changes of relevant risk variables on profit or loss and shareholders' equity. The periodic effects are determined by relating the hypothetical changes in the risk variables to the balance of financial instruments at the financial statement date. The balances at the end of the reporting period are usually representative for the year as a whole, therefore the impacts are calculated using the year end balances as though the balances had been constant throughout the reporting period. The methods and assumptions used in the sensitivity calculations have been updated to reflect the current economic situation.

a) Foreign currency risk

The functional currency of the Company and of the Group is the Macedonian denar.

The foreign exchange risk exposure of the Group is related to holding foreign currency cash balances, and operating activities through revenues from and payments to international telecommunications carriers as well as capital expenditure contracted with vendors in foreign currency.

The currency giving rise to this risk is primarily the EUR. The Group uses cash deposits in foreign currency, predominantly in EUR, and cash deposits in denars linked to foreign currency, to economically hedge its foreign currency risk in accordance with the available banks offers. The Group manages the foreign exchange risk exposure through maintaining higher amount of deposits in EUR as a proven stable currency.

The foreign currency risk sensitivity information required by IFRS 7 is limited to the risks that arise on financial instruments denominated in currencies other than the functional currency in which they are measured.

The Group accumulated more cash in EUR and USD than its trade payables in EUR and USD. At 31 December 2011, if MKD would have been 1% (2010: 1%) weaker or stronger against EUR, profit would have been MKD 49,188 thousand (2010: 58,321 MKD thousand) in net balance higher or lower, respectively. At 31 December 2011, if MKD would have been 1% (2010: 1%) weaker or stronger against USD, profit would have been MKD 677 thousand (2010: MKD 934 thousand) in net balance higher or lower, respectively.

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Change in the interest rates and interest margins may influence financing costs and returns on financial investments.

The interest rate risk and return on investment is of secondary importance compared to the safety and liquidity objectives described above. The Group is minimizing interest rate risk through defining of fixed interest rates in the period of the validity of certain financial investments. On the other hand fix term deposits may be prematurely terminated, since the contracts contain a clause that, the bank will calculate and pay interest by interest rate which is valid on the nearest maturity period of the deposit in accordance with the interest rates given in the offer.

In case of significant increase of the market interest rates, deposit may be terminated and replaced by new deposit with interest rate more favourable for the Group at lowest possible cost.

The investments are limited to relatively low risk financial investment forms in anticipation of earning a fair return relative to the risk being assumed.

The Group has no interest bearing liabilities, while it incurs interest rate risk on cash deposits with banks and loans to employees. No policy to hedge the interest rate risk is in place. Changes in market interest rates affect the interest income on deposits with banks.

Notes to the consolidated financial statements

The Group had MKD 9,013,304 thousand deposits (including call deposits) as of 31 December 2011, 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 90,133 thousand annually, while similar decrease would have caused the same decrease in interest received. Amount of deposit is MKD 9,611,091 thousand (including call deposits) as of 31 December 2010, therefore 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 96,111 thousand annually, while similar decrease would have caused the same decrease in interest received.

c) Other price risk

The Group's investments are in equity of other entities that are publically traded on the Macedonian Stock Exchange, both on its Official and Regular market. The management continuously monitors the portfolio equity investments based on fundamental and technical analysis of the shares. All buy and sell decisions are subject to approval by the relevant Company's bodies. In line with the Group strategy, the investments within portfolio are kept until there are favourable market conditions for their sale.

As part of the presentation of market risks, IFRS 7 also requires disclosures on how hypothetical changes in risk variables affect the price of financial instruments. As of 31 December 2011 and 31 December 2010, the Group holds investments, which could be affected by risk variables such as stock exchange prices.

The Group had MKD 54,083 thousand investments in equity of other entities that are publically traded on the Macedonian Stock Exchange as of 31 December 2011, 20% rise in market price would have caused (ceteris paribus) MKD 10,817 thousand gain, while similar decrease would have caused the same loss in the Profit for the year. The amount of the investments in equity of other entities that are publically traded on the Macedonian Stock Exchange is MKD 65,125 thousand as of 31 December 2010, therefore 20% rise in market price would have caused (ceteris paribus) MKD 13,025 thousand gain, while similar decrease would have caused the same loss in the Profit for the year.

3.1.2. Credit risk

Credit risk is defined as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Group is exposed to credit risk from its operating activities and certain financing activities.

Counterparty limits are determined based on the provided Letter of guarantees in accordance with the market conditions of those banks willing to issue a bank guarantee. The total amount of bank guarantees that will be provided should cover the amount of the projected free cash of the Group.

With regard to financing activities, transactions are primarily to be concluded with counterparties (banks) that have at least a credit rating of BBB+ (or equivalent) or where the counterparty has provided a guarantee where the guarantor has to be at least BBB+ (or equivalent).

In cases where Group's available funds are exceeding the total amount of the provided bank guarantees mentioned above, the financial investment of the available free cash is to be performed in accordance to the evaluation of the bank risk based on CAEL methodology ratings as an off – site rating system.

The depositing decisions are made based on the following priorities:

- To deposit in banks (Deutsche Telekom core banks, if possible) with provided bank guarantee from the banks with the best rating and the best quality wording of the bank guarantee.
- To deposit in banks with provided bank guarantee from the banks with lower rating and poorer quality wording of the bank guarantee.
- If the total amount of deposits cannot be placed in banks covered with bank guarantees with at least BBB+ rating (or equivalent credit rating), then depositing will be performed in local banks without bank guarantee. In this case, the determination of counterparty limits per banks shall be performed in accordance with CAEL methodology (evaluation of bank risk components – capital, assets, earning and liquidity).

CAEL methodology evaluates banks' financial ratios as an integral part of the four CAEL components - Capital, Assets, Earnings and Liquidity. The final score of the banks (on a scale from 1 to 5) is related to the banks' operations and performance for the analysed period. The Group policy is to invest in banks, which final score varies within following 3 ranges:

A - Banks with evaluation from 1.84 to 2.45 – investments not exceeding 80% from the bank shareholder's capital.

Notes to the consolidated financial statements

B - Banks with evaluation from 2.46 to 3.07 – investments not exceeding 70% from the bank shareholder's capital.

C - Banks with evaluation from 3.08 to 3.69 – investments not exceeding 60% from the bank shareholder's capital.

The process of managing the credit risk from operating activities includes preventive measures such as creditability checking and prevention barring, corrective measures during legal relationship for example reminding and disconnection activities, collaboration with collection agencies and collection after legal relationship as litigation process, court proceedings, involvement of the executive unit and factoring. The overdue payments are followed through a debt escalation procedure based on customer's type, credit class and amount of debt.

The credit risk is controlled through credibility checking – which determines that the customer is not indebted and the customer's credit worthiness and through preventive barring – which determinates the credit limit based on the customer's previous traffic revenues.

The Group has no significant concentration of credit risk with any single counter party or group of counter parties having similar characteristics.

The Group's procedures ensure on a permanent basis that sales are made to customers with an appropriate credit history and not exceed an acceptable credit exposure limit.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the Consolidated statement of financial position. Consequently, the Group considers that its maximum exposure is reflected by the amount of debtors net of provisions for impairment recognized and the amount of cash deposits in banks at the financial statement date.

The following table represents Group exposure to credit risk in 2011 and 2010:

In thousands of denars	2011	2010
Deposits with banks	7,943,462	8,205,444
Cash and cash equivalents	1,069,842	1,405,647
Trade debtors – domestic	2,508,031	2,758,465
Trade debtors – foreign	125,720	93,681
Loans to employees	140,360	123,036
Receivables from related parties	345,617	198,785
Other receivables	7,367	13,837
	<u>12,140,399</u>	<u>12,798,895</u>

Cash and cash equivalents in the table above exclude cash on hand as no credit risk exists for this category.

Largest amount of one deposit in 2011 is MKD 1,383,862 thousand, denominated in EUR 22,500 thousand, (2010: MKD 1,383,862 thousand). In addition, the Group has deposits with 4 domestic banks (2010: 5 domestic banks).

3.1.3. Liquidity risk

Liquidity risk is the risk that an entity may encounter difficulty in meeting obligations associated with financial liabilities.

Liquidity risk is defined as the risk that the Group could not be able to settle or meet its obligations on time.

The investment portfolio shall remain sufficiently liquid to meet all operating requirements that can be reasonably anticipated. This is accomplished by structuring the portfolio so that financial instruments mature concurrently with cash needs to meet anticipated demands.

The Group's policy is to maintain sufficient cash and cash equivalents to meet its commitments in the foreseeable future. Any excess cash is mostly deposited in commercial banks.

The Group's liquidity management process includes projecting cash flows by major currencies and considering the level of necessary liquid assets, considering business plan, historical collection and outflow data. Monthly, semi-annually and annually cash projections are prepared and updated on a daily basis by the Cash Management Department.

Notes to the consolidated financial statements

3.2. Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The total amount of equity managed by the Company, as at 31 December 2011, is MKD 17,686,517 thousand, as per local GAAP (2010: MKD 17,470,439 thousand). Out of this amount MKD 9,583,888 thousand (2010: MKD 9,583,888 thousand) represent share capital and MKD 1,916,777 thousand (2010: MKD 1,916,777 thousand) represent statutory reserves, which are not distributable (see note 2.13). The Company has also acquired treasury shares (see notes 2.12 and 15.1). The transaction is in compliance with the local legal requirements that by acquiring treasury shares the total equity of the Company shall not be less than the amount of the share capital and reserves which are not distributable to shareholders by law or by Company's statute. In addition, according the local legal requirements dividends can be paid out to the shareholders in amount that shall not exceed the net profit for the year as presented in the financial statements of the Company, increased for the undistributed net profit from previous years or increased for the other distributable reserves, i.e. reserves that exceed the statutory reserves and other reserves defined by the Company's statute. The Company is in compliance with all statutory capital requirements.

3.3. Fair value estimation

Cash and cash equivalents, trade receivables and other current financial assets mainly have short term maturity. For this reason, their carrying amounts at the reporting date approximate their fair values.

The fair value of the non-current portion of trade receivables comprising of employee loans is determined by using discounted cash-flow valuation technique.

Financial assets available for sale include investment in equity instruments that are measured at fair value.

The fair value of publicly traded financial assets at fair value through profit and loss is based on quoted market prices at the financial statement date.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Group makes estimates and assumptions concerning the future. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The most critical estimates and assumptions are outlined below.

4.1. Useful lives of assets

The determination of the useful lives of assets is based on historical experience with similar assets as well as any anticipated technological development and changes in broad economic or industry factors. The appropriateness of the estimated useful lives is reviewed annually, or whenever there is an indication of significant changes in the underlying assumptions. We believe that the accounting estimate related to the determination of the useful lives of assets is a critical accounting estimate since it involves assumptions about technological development in an innovative industry and heavily dependent on the investment plans of the Group. Further, due to the significant weight of depreciable assets in our total assets, the impact of any changes in these assumptions could be material to our financial position, and results of operations. As an example, if the Group was to shorten the average useful life of its assets by 10%, this would result in additional annual depreciation and amortisation expense of approximately MKD 395,068 thousand (2010: MKD 340,281 thousand). See note 11 and 12 for the changes made to useful lives in the reported years.

The Group constantly introduces a number of new services or platforms including, but not limited to, the Universal Mobile Telecommunications System (UMTS) based broadband services in the mobile communications and the fibre-to-the-home rollout. In case of the introduction of such new services, the Group conducts a revision of useful lives of the already existing platforms, but in the vast majority of the cases these new services are designed to co-exist with the old platforms, resulting in no change-over to the new technology. Consequently, the useful lives of the older platforms usually do not require shortening.

In 2011 the Group started a major project for Radio Access Network modernization in the mobile segment. The Group conducted an item by item revision of the useful life of the related assets, which in general resulted in shortening of their useful life.

Notes to the consolidated financial statements

4.2. Estimated impairment of property, plant and equipment, and intangibles

We assess the impairment of identifiable property, plant, equipment and intangibles whenever there is a reason to believe that the carrying value may materially exceed the recoverable amount and where impairment of value is anticipated. The calculations of recoverable amounts are primarily determined by value in use calculations, which use a broad range of estimates and factors affecting those. Among others, we typically consider future revenues and expenses, technological obsolescence, discontinuance of services and other changes in circumstances that may indicate impairment. If impairment is identified using the value in use calculations, we also determine the fair value less cost to sell (if determinable), to calculate the exact amount of impairment to be charged. As this exercise is highly judgmental, the amount of a potential impairment may be significantly different from that of the result of these calculations. Management has performed an impairment test based on a 10 years cash flow projection and used a perpetual growth rate of 2% (2010: 2%) to determine the terminal value after 10 years. The Group uses fair values less cost to sell calculation. The discount rate used was 9.39% (2010: 9.38%). The impairment test did not result in impairment.

4.3. Estimated impairment of trade and other receivables

We calculate impairment for doubtful accounts based on estimated losses resulting from the inability of our customers to make the required payments. For the largest customers, international customers and for customers under litigation and bankruptcy proceedings impairment is calculated on an individual basis, while for other customers it is estimated on a portfolio basis, for which we base our estimate on the ageing of our account receivables balance and our historical write-off experience, customer credit-worthiness and recent changes in our customer payment terms (see note 2.4.1 (b)). These factors are reviewed periodically, and changes are made to the calculations when necessary. In 2011 the Group performed detailed analysis of the customers' portfolios and included in the individual valuation also the customers of interconnection services. In addition, the Group analysed the nature of the business (residential, business, fixed line, mobile etc.) as well as the collection efficiency, which resulted in changes in the calculations and lower impairment of trade and other receivables in 2011. If the financial condition of our customers were to deteriorate, actual write-offs of currently existing receivables may be higher than expected and may exceed the level of the impairment losses recognized so far (see note 3.1.2).

4.4. Provisions

Provisions in general are highly judgmental, especially in case of legal disputes. The Group assesses the probability of an adverse event as a result of a past event and if the probability of an outflow of economic benefits is evaluated to be more than 50%, the Group fully provides for the total amount of the estimated liability (see note 2.10). As the assessment of the probability is highly judgmental, in some cases the evaluation may not prove to be in line with the eventual outcome of the case. In order to determine the probabilities of an adverse outcome, the Group uses internal and external legal counsel.

4.5. Subscriber acquisition costs

Subscriber acquisition costs primarily include the loss on the equipment sales (revenues and costs presented on a gross basis) and fees paid to subcontractors that act as agents to acquire new customers. The Group's agents also spend a portion of their agent fees for marketing the Group's products, while a certain part of the Group's marketing costs could also be considered as part of the subscriber acquisition costs. The up-front fees collected from customers for activation or connection are marginal compared to the acquisition costs. These revenues and costs are recognized when the customer is connected to the Group's fixed or mobile networks. No such costs or revenues are capitalized or deferred. These acquisition costs (losses) are recognized immediately as they are not accurately separable from other marketing costs. The total amount of agent fees in 2011 is MKD 277,286 thousand (2010: MKD 338,550 thousand).

5. CASH AND CASH EQUIVALENTS

In thousands of denars	2011	2010
Call deposits	1,069,842	1,405,647
Cash on hand	8,273	8,425
	<u>1,078,115</u>	<u>1,414,072</u>

The interest rate on call deposits is in range from 0.30% p.a. to 2.25% p.a. (2010: from 0.50% p.a. to 2.00% p.a.). These deposits have maturities of less than 3 months.

Notes to the consolidated financial statements

The carrying amounts of the cash and cash equivalents are denominated in the following currencies:

In thousands of denars	2011	2010
MKD	636,070	1,360,206
EUR	409,035	42,579
USD	32,871	11,283
Other	139	4
	<u>1,078,115</u>	<u>1,414,072</u>

Following is the breakdown of call deposits by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2011	2010
Credit rating of the Guarantor : A+	9,669	816,177
Credit rating of the Guarantor : A	267,511	475,581
Credit rating of the Guarantor : A-	-	80,983
Credit rating of the Guarantor : BBB	761,641	-
Credit rating of the Guarantor : BB+	-	32,906
Credit rating of the Guarantor : B-	31,021	-
	<u>1,069,842</u>	<u>1,405,647</u>

6. DEPOSITS WITH BANKS

Deposits with banks represent cash deposits in reputable domestic banks, with interest rates in range from 1.30% p.a. to 4.35% p.a. (2010: from 1.00% p.a. to 4.35% p.a.) and with maturity between 3 and 12 months.

The carrying amounts of the deposits with banks are denominated in the following currencies:

In thousands of denars	2011	2010
MKD	3,097,200	2,019,238
EUR	4,846,262	6,186,206
	<u>7,943,462</u>	<u>8,205,444</u>

Following is the breakdown of deposits with banks by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2011	2010
Credit rating of the Guarantor : A+	4,550,660	2,235,141
Credit rating of the Guarantor : A	2,474,898	1,843,416
Credit rating of the Guarantor : A-	-	4,125,897
Credit rating of the Guarantor : BBB	917,886	-
Credit rating of the Guarantor : BB+	-	990

Notes to the consolidated financial statements

7. TRADE AND OTHER RECEIVABLES

In thousands of denars	2011	2010
Trade debtors – domestic	4,244,854	4,611,686
Less: allowance for impairment	<u>(1,736,823)</u>	<u>(1,853,221)</u>
Trade debtors – domestic – net	2,508,031	2,758,465
Trade debtors – foreign	125,720	93,681
Receivables from related parties	345,617	198,785
Loans to third parties	3,470	3,088
Less: allowance for impairment	<u>(3,470)</u>	<u>(3,088)</u>
Loans to third parties– net	-	-
Loans to employees	140,360	123,036
Other receivables	<u>7,367</u>	<u>13,837</u>
Financial assets	3,127,095	3,187,804
Advances given to suppliers	106,495	110,247
Less: allowance for impairment	<u>(74,156)</u>	<u>(74,156)</u>
Advances given to suppliers – net	32,339	36,091
Prepayments and accrued income	<u>249,953</u>	<u>211,069</u>
	<u>3,409,387</u>	<u>3,434,964</u>
Less non-current portion: Other receivables	(1,774)	(8,714)
Less non-current portion: Loans to employees	(116,521)	(99,363)
Less non-current portion: Trade debtors – domestic	<u>(211,339)</u>	<u>(207,202)</u>
Current portion	<u>3,079,753</u>	<u>3,119,685</u>

Receivables from related parties represent receivables from Magyar Telekom Group and Deutsche Telekom Group (see note 28).

Loans to employees are collateralised by mortgages over real estate or with promissory note.

Loans to third parties represent loan with reference interest rate of 6 months EURIBOR with margin of 0.3%. Loans granted to employees carry effective interest rates of 6.25% p.a. and 9.45% p.a. (2010: 6.25% p.a., 7% p.a. and 9.45% p.a.).

Other receivables contain restricted cash in amount of MKD 1,987 thousand (2010: MKD 10,391 thousand) representing performance guaranties issued for sales projects.

All non-current receivables are due within 15 years of the financial statement date.

As of 31 December 2011, domestic trade debtors of MKD 2,324,981 thousand (2010: MKD 2,470,668 thousand) are impaired. The ageing of these receivables is as follows:

In thousands of denars	2011	2010
Less than 30 days	330,152	339,428
Between 31 and 180 days	292,736	366,614
Between 181 and 360 days	108,830	124,699
More than 360 days	<u>1,593,263</u>	<u>1,639,927</u>
	<u>2,324,981</u>	<u>2,470,668</u>

As of 31 December 2011, domestic trade receivables in amount of MKD 150,921 thousand were past due but not impaired. These are mainly related to customers for interconnection services assessed on individual basis in accordance with past Group experience and current expectations (see note 2.4.1). The analysis of these past due domestic trade receivables is as follows:

Notes to the consolidated financial statements

In thousands of denars	2011
Less than 30 days	103,957
Between 31 and 60 days	21,456
Between 61 and 90 days	5,886
Between 91 and 180 days	17,420
Between 181 and 360 days	1,586
More than 360 days	616
	<u>150,921</u>

The total amount of the provision for domestic trade debtors is MKD 1,736,823 thousand (2010: MKD 1,853,221 thousand). Out of this amount MKD 1,450,377 thousand (2010: MKD 1,697,080 thousand) relate to provision made according the ageing structure of the above receivables, while, the amount of MKD 119,221 thousand (2010: MKD 97,552 thousand) is from customers under liquidation and bankruptcy which are fully impaired. In addition, the Group has a specific provision calculated in respect of a certain group of customers in amounting to MKD 167,225 thousand (2010: MKD 58,589 thousand).

The amount of impairment is mainly a result of receivables which are overdue more than 720 days. The total amount of fully impaired receivables is MKD 1,518,106 thousand (2010: MKD 1,563,368 thousand). These receivables are mainly from two way disconnected customers, dismantled customers, litigated customers and customers that are no longer using the Group services.

The fair values of financial assets within trade and other receivables category are as follows:

In thousands of denars	2011	2010
Trade debtors – domestic	2,508,031	2,758,465
Trade debtors – foreign	125,720	93,681
Receivables from related parties	345,617	198,785
Loans to employees	140,360	123,036
Other receivables	7,367	13,837
	<u>3,127,095</u>	<u>3,187,804</u>

Movement in allowance for impairment of domestic trade debtors:

In thousands of denars	2011	2010
Impairment losses at 1 January	1,853,221	2,064,471
Charged to expense	595	147,407
Write off	(116,993)	(358,657)
Impairment losses at 31 December	<u>1,736,823</u>	<u>1,853,221</u>

Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

As of 31 December 2011, foreign trade receivables in amount of MKD 110,651 thousand (2010: MKD 49,011 thousand) were past due but not impaired. These relate to a number of international customers assessed on individual basis in accordance with past Group experience and current expectations. The analysis of these past due foreign trade receivables is as follows:

In thousands of denars	2011	2010
Less than 30 days	27,800	17,758
Between 31 and 60 days	13,808	3,318
Between 61 and 90 days	7,323	1,839
Between 91 and 180 days	18,478	11,001
Between 181 and 360 days	438	7,448
More than 360 days	42,804	7,647
	<u>110,651</u>	<u>49,011</u>

Notes to the consolidated financial statements

The Group has renegotiated domestic trade receivables in carrying amount of MKD 41,102 thousand (2010: MKD 46,056 thousand). The carrying amount of loans and receivables, which would otherwise be past due, whose terms have been renegotiated is not impaired if the collectability of the renegotiated cash flows are considered ensured.

The carrying amounts of the group's non-current trade and other receivables are denominated in the following currencies:

In thousands of denars	2011	2010
MKD	<u>329,634</u>	<u>315,279</u>
	<u>329,634</u>	<u>315,279</u>

The carrying amounts of the group's current trade and other receivables are denominated in the following currencies:

In thousands of denars	2011	2010
MKD	2,558,923	2,822,730
EUR	508,414	286,501
USD	6,721	5,745
Other	<u>5,695</u>	<u>4,709</u>
	<u>3,079,753</u>	<u>3,119,685</u>

The credit quality of trade receivables that are neither past due nor impaired is assessed based on historical information about counterparty default rates.

Following is the credit quality categories of neither past due nor impaired domestic trade receivables:

In thousands of denars	2011	2010
Group 1	1,093,974	1,500,640
Group 2	300,597	178,600
Group 3	<u>163,042</u>	<u>254,575</u>
	<u>1,557,613</u>	<u>1,933,815</u>

Following is the credit quality categories of neither past due nor impaired foreign trade receivables:

In thousands of denars	2011	2010
Group 1	12,929	42,041
Group 2	<u>2,140</u>	<u>2,629</u>
	<u>15,069</u>	<u>44,670</u>

Group 1 – fixed line related customers that on average are paying their bills before due date and mobile related customers with no disconnections in the last 12 month.

Group 2 – fixed line related customers that on average are paying their bills on due date and mobile related customers with up to 3 disconnections in the last 12 month.

Group 3 – fixed line related customers that on average are paying their bills after due date and mobile related customers with more than 3 disconnections in the last 12 month.

8. OTHER TAXES

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2011 the tax computed on non-deductable expenses are presented as part of Other operating expenses in the Profit for the year and Other taxes in the Financial position statement (see note 18).

Notes to the consolidated financial statements

8.1. Other taxes receivable

In thousands of denars	2011	2010
VAT receivable	556	62,611
Receivable for tax on non-deductable expenses	<u>59,294</u>	<u>32,121</u>
	<u>59,850</u>	<u>94,732</u>

8.2. Other taxes payable

In thousands of denars	2011	2010
VAT payable	52,654	25,433
Other taxes payable	<u>670</u>	<u>3,328</u>
	<u>53,324</u>	<u>28,761</u>

9. INVENTORIES

In thousands of denars	2011	2010
Materials	178,810	193,627
Inventory for resale	418,100	322,214
Write down of inventories to net realisable value	<u>(17,460)</u>	<u>(10,847)</u>
	<u>579,450</u>	<u>504,994</u>

Movement in allowance for inventories to net realizable value:

In thousands of denars	2011	2010
Allowance at 1 January	10,847	44,912
Charged to expense	9,245	(25,727)
Write off	<u>(2,632)</u>	<u>(8,338)</u>
Allowance at 31 December	<u>17,460</u>	<u>10,847</u>

Allowance for inventory mainly relates to trade goods. Write down of inventories to net realizable value is based on the analysis of lower cost and net realizable value at the financial statement dates.

10. NON-CURRENT ASSETS HELD FOR SALE

Non-current assets held for sale represent property, plant and equipment, mainly buildings, within the Group which carrying amount will be recovered principally through sale transaction or exchange rather than through continuing use which is not considered by management to be probable. Management intentions are to sell these assets within one year, subject to extension in certain circumstances. There is a plan to sell or exchange these assets and either the management has started to actively market them at a reasonable price or there is already an arrangement for sale with a specific customer. Out of the total amount of MKD 628,252 thousand (2010: MKD 38,139 thousand) presented as assets held for sale in the Consolidated statement of financial position MKD 549,115 thousand (2010: MKD 38,139 thousand) are part of the fixed line segment and MKD 79,137 thousand (2010: nil) are part of the mobile segment. In 2011 the Group signed an agreement to provide 4 of its administrative buildings and cash consideration in exchange for one new building in 2012. Accordingly, the carrying amounts of these 4 buildings in amount of MKD 615,690 thousand were reclassified to assets held for sale in the Consolidated statement of financial position as of 31 December 2011. Out of this amount MKD 536,553 thousand are part of the fixed line segment and MKD 79,137 thousand are part of the mobile segment.

Notes to the consolidated financial statements

Notes to the consolidated financial statements

The reviews of the useful lives of intangible assets during 2011 affected the lives of a number of assets mainly including software. The reviews primarily resulted in the extension of the useful lives as a result of later expected replacement of the affected assets than originally estimated.

The reviews results in the following change in the original trend of amortisation in the current and future years.

In thousands of denars

	2011	2012	2013	2014	After 2014
(Decrease)/increase in amortisation	(62,589)	(3,302)	43,342	14,188	8,361
	<u>(62,589)</u>	<u>(3,302)</u>	<u>43,342</u>	<u>14,188</u>	<u>8,361</u>

13. TRADE AND OTHER PAYABLES

In thousands of denars

	2011	2010
Trade payables		
-Domestic	648,678	899,102
-Foreign	650,510	822,654
Liabilities to related parties	191,561	175,618
Other liabilities	<u>42,291</u>	<u>139,650</u>
Financial liabilities	1,533,040	2,037,024
Accrued expenses	1,055,990	1,046,838
Deferred revenue	489,109	647,976
Advances received	54,600	53,104
Other	<u>34,767</u>	<u>34,765</u>
	<u>3,167,506</u>	<u>3,819,707</u>
Less non-current portion: Deferred revenue	<u>(85,275)</u>	<u>(97,802)</u>
Current portion	<u>3,082,231</u>	<u>3,721,905</u>

Non-current deferred revenues have maturity up to 10 years from the date of the Consolidated statement of financial position.

Liabilities to related parties represent liabilities to Magyar Telekom Group and Deutsche Telekom Group (see note 28).

The ageing analysis of domestic and foreign trade payables are as follows:

In thousands of denars	2011	2010
Less than 90 days	1,136,733	1,625,501
Between 90 and 180 days	96,771	56,110
More than 181 days	<u>65,684</u>	<u>40,145</u>
	<u>1,299,188</u>	<u>1,721,756</u>

The table above does not represent a contractual maturity but rather an ageing analysis where the major part of the payables are within 90 days which is the Company's regular term for payment to suppliers.

The carrying amounts of the current portion of trade and other payables are denominated in the following currencies:

In thousands of denars	2011	2010
MKD	2,110,773	2,910,473
EUR	844,881	683,174
USD	107,282	110,465
Other	<u>19,295</u>	<u>17,793</u>
	<u>3,082,231</u>	<u>3,721,905</u>

Notes to the consolidated financial statements

14. PROVISION FOR OTHER LIABILITIES AND CHARGES

In thousands of denars	Legal cases	Other	Total
1 January 2010	975,209	268,907	1,244,116
Additional provision	279,281	26,230	305,511
Unused amount reversed	(342,418)	(6,024)	(348,442)
Used during period	(57,671)	(227,972)	(285,643)
31 December 2010	<u>854,401</u>	<u>61,141</u>	<u>915,542</u>

In thousands of denars	Legal cases	Other	Total
1 January 2011	854,401	61,141	915,542
Additional provision	42,465	21,517	63,982
Unused amount reversed	(194,763)	(2,433)	(197,196)
Used during period	(271,880)	(8,516)	(280,396)
31 December 2011	<u>430,223</u>	<u>71,709</u>	<u>501,932</u>

Analysis of total provisions:

In thousands of denars	2011	2010
Non-current (legal cases and other)	369,583	527,340
Current	<u>132,349</u>	<u>388,202</u>
	<u>501,932</u>	<u>915,542</u>

Provisions for legal cases mainly relate to certain legal and regulatory claims brought against the Group.

Three legal cases are in process against the Company relating to: a dispute with a competitor, which alleges that the Company has abused its dominant position on the market and is seeking damages of MKD 264,450 thousand; a dispute with a competitor, which alleges that the Company has abused its dominant position on the market and is seeking damages of MKD 100,521 thousand; and a misdemeanour procedure initiated by a regulatory body for alleged abuse of dominant position on the market by the Company with maximum possible fine of 10% of the annual revenue from the previous year, in accordance with the local legislation. The information usually required by IAS 37 is not disclosed. Management recognizes a provision for its best estimate of the obligation but does not disclose the information required by paragraph 85 of IAS 37 because the management believes that to do so would seriously prejudice the outcome of these cases. In addition, there are numerous legal cases for which provisions were recognized, none of which are individually material, therefore not disclosed.

Management does not expect that the outcome of these legal claims will give rise to any significant loss beyond the amounts provided at 31 December 2011.

Other includes provision made for the legal obligation of the Group to pay to employees two average monthly salaries in Republic of Macedonia at their retirement date (see note 2.15.1) and provision made for Magyar Telekom's Mid Term Incentive Plan ("MTIP") (see note 29). The provision is recognized against Personnel expenses in the Profit for the year. In addition, as a result of the findings of the Investigation, the identified impact was recognized under Provision for other liabilities and charges in amount of MKD 36,019 thousand as of 31 December 2011 (2010: MKD 33,862 thousand) (see note 1.2).

15. CAPITAL AND RESERVES

Share capital consists of the following:

In thousands of denars	2011	2010
Ordinary shares	9,583,878	9,583,878
Golden share	<u>10</u>	<u>10</u>
	<u>9,583,888</u>	<u>9,583,888</u>

Notes to the consolidated financial statements

Share capital consists of one golden share with a nominal value of MKD 9,733 and 95,838,780 ordinary shares with a nominal value of MKD 100 each.

The golden share with a nominal value of MKD 9,733 is held by the Government of the Republic of Macedonia. In accordance with Article 16 of the Statute, the golden shareholder has additional rights not vested in the holders of ordinary shares. Namely, no decision or resolution of the Shareholders' Assembly related to: generating, distributing or issuing of share capital; integration, merging, separation, consolidation, transformation, reconstruction, termination or liquidation of the Company; alteration of the Company's principal business activities or the scope thereof; sale or abandonment either of the principal business activities or of significant assets of the Company; amendment of the Statute of the Company in such a way so as to modify or cancel the rights arising from the golden share; or change of the brand name of the Company; is valid if the holder of the golden share, votes against the respective resolution or decision. The rights vested in the holder of the golden share are given in details in the Company's Statute.

As of 31 December 2011, the ordinary shares of the Company were held as follows:

In thousands of denars	2011	%
Stonebridge AD Skopje, in liquidation	4,887,778	51.00
Government of the Republic of Macedonia	3,336,497	34.81
The Company (treasury shares)	958,388	10.00
International Finance Corporation (IFC)	179,698	1.88
Other minority shareholders	221,527	2.31
	<u>9,583,888</u>	<u>100.00</u>

15.1. Treasury shares

The Company acquired 9,583,878 of its own shares, representing 10% of its shares, through the Macedonian Stock Exchange during June 2006. The total amount paid to acquire the shares, net of income tax, was MKD 3,843,505 thousand. The shares are held as treasury shares.

As a result of the findings of the Investigation, for one consultancy contract, the payments of which was erroneously capitalized as part of treasury shares in 2006 has been retrospectively derecognized from treasury shares (see note 1.2).

The amount of treasury shares of MKD 3,738,358 thousand (after restatement), has been deducted from shareholders' equity. The Company has the right to reissue these shares at a later date. All shares issued by the Company were fully paid.

Notes to the consolidated financial statements

16. REVENUES

In thousands of denars	2011	2010
Fixed line revenues		
Voice retail	2,925,866	3,389,509
Voice wholesale	1,950,786	1,755,359

Total Mobile revenue	<u>8,292,990</u>	<u>9,418,066</u>
	<u>15,694,588</u>	<u>17,209,122</u>

17. PERSONNEL EXPENSES

In thousands of denars	2011	2010
Salaries	1,000,458	1,056,628
Contributions on salaries	320,087	335,535
Bonus payments	235,705	253,211
Other staff costs	102,195	168,313
Capitalised personnel costs	<u>(119,698)</u>	<u>(117,197)</u>
	<u>1,538,747</u>	<u>1,696,490</u>

Other staff costs mainly include holiday's allowance, termination benefits for 9 employees leaving the Group in 2011 (2010: 52 employees) and other benefits.

Bonus payments also include the cost for MTIP (see note 29).

Notes to the consolidated financial statements

18. OTHER OPERATING EXPENSES

In thousands of denars	2011	2010
Purchase cost of goods sold	1,495,422	1,597,978
Services	888,681	1,077,111
Marketing and donations	466,432	492,468
Materials and maintenance	318,490	442,402
Premium rate services	302,569	316,116
Energy	298,663	244,825
Fees, levies and local taxes	146,892	180,866
Rental fees	131,410	115,213
Consultancy	69,891	96,736
Tax on non-deductable expenses	29,381	92,586
Insurance	21,011	21,528
Impairment losses on trade and other receivables	595	147,407
Other	60,213	71,085
	<u>4,229,650</u>	<u>4,896,321</u>

Services mainly include agent commissions, postal expenses, expenses for maintenance of IT equipment and other service fees (such as cleaning, security and other).

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2010 and 2011 the tax computed on non-deductable expenses are presented as part of Other operating expenses in the Profit for the year and as part of Other taxes in the Financial position statement (see note 8).

19. OTHER OPERATING INCOME

Other operating income represents gain on sale of PPE.

20. FINANCE EXPENSES

In thousands of denars	2011	2010
Interest expense	42,408	131,765
Bank charges and other commissions	38,735	49,067
Fair value and available for sale - loss	11,425	646
	<u>92,568</u>	<u>181,478</u>

21. FINANCE INCOME

In thousands of denars	2011	2010
Interest income	231,004	382,028
Net foreign exchange gain	4,317	47,781
Dividend income	3,282	2,789
Fair value gain	-	3,749
	<u>238,603</u>	<u>436,347</u>

Dividend income is from financial asset at fair value through profit and loss. Interest income is generated from financial assets classified as loans and receivables.

Notes to the consolidated financial statements

22. INCOME TAX EXPENSE

Recognized in the Profit for the year:

In thousands of denars	2011	2010
Current tax expense		
Current year	-	17,416
Deferred tax expense		
Origination and reversal of temporary differences	-	60,776
Total income tax in profit for the year	-	78,192

Commencing from 1 January 2009 and during 2010 The Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. In addition, the income tax shall apply at the moment of the distribution of the profits in a form of dividends. Subsequently, as long as the undistributed profits are retained within the company the income tax would not be applied (see note 2.17).

Up to now the tax authorities had carried out a full-scope tax audits at the Company for 2005 and the years preceding. Additionally, audit of personal income tax was carried out by the tax authorities for the period 1 January 2005 to 31 March 2006. During 2010 there was tax audit conducted by the Public revenue office for income tax for 2008 and 2009, withholding tax for 2007 and 2008 and VAT for 2009. In addition, in 2011 the Public revenue office conducted tax audit for withholding tax for 2010 and tax audit over certain service contracts from Transfer pricing perspective which were without any findings.

The tax authorities may at any time inspect the books and records within 5 years subsequent to the reported tax year, and may impose additional tax assessments and penalties. In a case of tax evasion or tax fraud the statute of limitations may be extended up to 10 years. The Company's management is not aware of any circumstances, which may give rise to a potential material liability in this respect other than those provided for in these consolidated financial statements.

23. DIVIDENDS

The Shareholders' Assembly of the Company, at its meeting, held on 14 April 2011 adopted a Resolution for the dividend payment for the year 2010. The Resolution on dividend payment for 2010 is in the amount of MKD 5,947,479 thousand from the net profit for the year 2010. The dividend was paid out in April 2011. Up to date of issuing of these consolidated financial statements, no dividends have been declared for 2011.

24. REPORTABLE SEGMENTS AND INFORMATION

24.1. Reportable segments

The Group's reportable segments are: fixed line and mobile segment.

The fixed line segment provides local, national and international long distance telephone services, VoIP services, leased line services, Internet services and TV distribution services under the T-Home brand.

The mobile segment provides mobile telecommunication services under the T-Mobile brand.

24.2. Information regularly provided to the chief operating decision maker

The following tables present the segment information by reportable segment regularly provided to the Chief operating decision maker of the Company, reconciled to the corresponding Group numbers. The information regularly provided to the GMC includes several measures of profit which are considered for the purposes of assessing performance and allocating resources, including EBITDA adjusted for the impact of certain items considered as "special influence". These items vary year-over-year in nature and magnitude. Management believes that EBITDA is the segment measure that is most consistent with the measurement principles used in measuring the corresponding amounts in these financial statements.

Notes to the consolidated financial statements

Revenues

In thousands of denars	2011	2010
Total Fixed Line segment revenues	8,097,102	8,483,703
Less: Fixed Line segment revenues from other segment	<u>(708,430)</u>	<u>(694,405)</u>
Fixed Line segment revenues from external customers	7,388,672	7,789,298
Total Mobile segment revenues	9,509,271	10,490,872
Less: Mobile segment revenues from other segment	<u>(1,203,355)</u>	<u>(1,071,048)</u>
Mobile segment revenues from external customers	8,305,916	9,419,824
Total revenues of the Group	<u>15,694,588</u>	<u>17,209,122</u>

None of the Group's external customers represent a significant source of revenue.

Segment results (EBITDA)

In thousands of denars	2011	2010
Fixed Line segment	3,997,906	3,953,869
Mobile segment	<u>4,384,067</u>	<u>5,081,012</u>
Total EBITDA of the Group	8,381,973	9,034,881
Depreciation and amortisation of the Group	<u>3,610,804</u>	<u>3,161,352</u>
Total operating profit of the Group	<u>4,771,169</u>	<u>5,873,529</u>
Finance income – net	<u>146,035</u>	<u>254,869</u>
Profit before income tax of the Group	<u>4,917,204</u>	<u>6,128,398</u>

Capital expenditure (CAPEX) on PPE and Intangible assets

In thousands of denars	2011	2010
Fixed Line segment	1,385,538	2,187,437
Mobile segment	<u>801,988</u>	<u>1,223,128</u>
Total capital expenditure on PPE and Intangible assets of the Group	<u>2,187,526</u>	<u>3,410,565</u>

The amounts disclosed as "Capital expenditure on PPE and Intangible assets" correspond to the "Investment" line disclosed in notes 11 and 12.

25. LEASES AND OTHER COMMITMENTS

25.1. Operating lease commitments – where the Group is the lessee:

Operating lease commitments – where the Group is the lessee, are mainly from lease of buildings, business premises and other telecommunications facilities.

The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

In thousands of denars	2011	2010
Not later than 1 year	118,174	105,382
Later than 1 year and not later than 5 years	274,788	266,612
Later than 5 years	<u>93,054</u>	<u>104,623</u>
	<u>486,016</u>	<u>476,617</u>

25.2. Operating lease commitments – where the Group is the lessor:

Operating lease commitments – where the Group is the lessor are mainly from lease of land sites for base stations.

Notes to the consolidated financial statements

The future aggregate minimum lease receivables under non-cancellable operating leases are as follows:

In thousands of denars	2011	2010
Not later than 1 year	22,340	21,790
Later than 1 year and not later than 5 years	87,381	85,322
Later than 5 years	<u>45,418</u>	<u>63,942</u>
	<u>155,139</u>	<u>171,054</u>

25.3. Capital commitments

The amount authorized for capital expenditure as at 31 December 2011 was MKD 447,731 thousand (2010: MKD 437,188 thousand). In addition, in 2011 the Group signed an agreement to exchange 4 of its administrative buildings along with cash consideration for one new building in 2012, which resulted in an amount authorized for capital expenditure as at 31 December 2011 of MKD 2,294,323 thousand (see note 10).

26. ADDITIONAL DISCLOSURES ON FINANCIAL ASSETS

The Group classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (a) quoted prices (unadjusted) in active markets for identical assets (Level 1);
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly (Level 2); and
- (c) inputs for the asset that are not based on observable market data (Level 3).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The significance of an input is assessed against the fair value measurement in its entirety.

There was no transfer between Level 1 and Level 2 financial assets.

26.1. Financial assets – Carrying amounts and fair values

The table below shows the categorization of financial assets as at 31 December 2010.

Assets In thousands of denars	Financial assets				Carrying amount	Fair value
	Loans and receivables	Held-to-maturity	Available-for-sale (Level 2)	At fair value through profit and loss (Level 1)		
Cash and cash equivalents	1,414,072	-	-	-	1,414,072	1,414,072
Deposits with banks	8,205,444	-	-	-	8,205,444	8,205,444
Trade and other receivables	3,119,685	-	-	-	3,119,685	3,119,685
Other non-current assets	-	-	305	-	305	305
Financial assets at fair value through profit and loss	-	-	-	65,125	65,125	65,125

Notes to the consolidated financial statements

The table below shows the categorization of financial assets as at 31 December 2011.

Assets In thousands of denars	Financial assets			At fair value		Carrying amount	Fair value
	Loans and receivables	Held-to- maturity	Available-for- sale (Level 2)	through profit and loss (Level 1)			
Cash and cash equivalents	1,078,115	-	-	-	-	1,078,115	1,078,115
Deposits with banks	7,943,462	-	-	-	-	7,943,462	7,943,462
Trade and other receivables	3,079,753	-	-	-	-	3,079,753	3,079,753
Other non-current assets	-	-	612	-	-	612	612
Financial assets at fair value through profit and loss	-	-	-	54,083	-	54,083	54,083

Loans and receivables are measured at amortized cost, while available-for-sale and held-for-trading assets are measured at fair value.

Cash and cash equivalents, bank deposits, trade receivables and other current financial assets mainly have short times to maturity. For this reason, their carrying amounts at the end of the reporting period approximate their fair values.

Financial assets available for sale include insignificant investment in equity instruments, measured at fair value.

Financial assets at fair value through profit or loss include investments in equity instruments in the amount of MKD 54,083 thousand (2010: MKD 65,125 thousand) calculated with reference to the Macedonian Stock Exchange quoted bid prices. Changes in fair values of other financial assets at fair value through profit or loss are recorded in finance income/expenses in the Profit for the year (see note 20 and 21). The cost of these equity investments is MKD 31,786 thousand (2010: MKD 31,786 thousand).

26.2. Other disclosures about financial instruments

The Group is also exposed to risks that arise from the possible drawdown of guarantees in a nominal amount of MKD 1,987 thousand as at 31 December 2011 (2010: MKD 10,391 thousand). These guarantees were issued by Macedonian banks on behalf of the Company, or its subsidiary, as collaterals to secure the fulfilment of the Group's certain contractual obligations. The Group has been delivering on its contractual obligations and expects to continue doing so in the future, therefore no drawdown of the guarantees has happened so far, and is not expected to happen in the future.

There were no financial assets or liabilities, which were reclassified into another financial instrument category.

No financial assets were transferred in such a way that part or all of the financial assets did not qualify for de-recognition.

27. CONTINGENCIES

The Company has contingent liabilities in respect of legal and regulatory claims arising in the ordinary course of business. It is not anticipated by the management of the Company that any material liabilities will arise from the contingent liabilities other than those provided for (see note 14).

The subsidiary has contingent liabilities in respect to routine legal proceedings arising in the ordinary course of business. The major contingent liability in amount of MKD 978,661 thousand relate to legal case with Newsphone S DOO Skopje for possible damage compensation with regards to lost future profits as a result of termination of contract by the subsidiary. Based on legal advice, the Management expects that it is not probable that an outflow of resources embodying economic benefits will be required to settle these obligations and consequently no provision was recorded.

28. RELATED PARTY TRANSACTIONS

All transactions with related parties arise in the normal course of business and their value is not materially different from the terms and conditions that would prevail in arms-length transactions.

Notes to the consolidated financial statements

Transactions with related parties include provision and supply of telecommunication services and equipment, loans granted and supply of management consultancy services. The amounts receivable and payable are disclosed in the appropriate notes (see note 7 and 13).

The revenues and expenses with the Company's related parties are as follows:

In thousands of denars	2011		2010

29. KEY MANAGEMENT COMPENSATION

The compensation of key management from the Company, including taxation charges and contributions, is presented below:

In thousands of denars	2011	2010
Short-term employee benefits (including taxation)	124,237	115,636
State contributions on short-term employee benefits	6,005	6,185
Share-based payments	10,030	1,591
	<u>140,272</u>	<u>123,412</u>

The remuneration of the members of the Company's Board of Directors amounted to MKD 6,200 thousand (2010: MKD 4,650 thousand) included in Short-term employee benefits.

The share-based payments represent compensation of key management from the Company as part of a Mid Term Incentive Plan (MTIP) launched by Magyar Telekom Plc., whereby the targets to be achieved are based on the performance of the Magyar Telekom Plc. shares. Participants include top and senior managers of the Magyar Telekom Group.

The MTIP is operated by Magyar Telekom Plc. while the compensation of key management from the Company related to the MTIP is incurred by the Company (for MTIP programs launched 2008, 2009 and 2010) and is included in Personnel expenses (Bonus Payments) recognized against Other provisions (see notes 17 and 14).

30. EVENTS AFTER THE FINANCIAL STATEMENT DATE

There are no events after the financial statement date that would have impact on the 2011 profit for the year, consolidated statement of financial position or cash flows.
